REFERENCES

- Johannis Christianus Oersted [sic], *Experimenta circa effectum conflictus electrici in acum magneticam*, pamphlet 4pp, 21 July 1820. In Latin, with no diagrams! French translation made in the same year.
- A K T Assis and J P M Chaib, *Ampère's electrodynamics* (Apeiron, Montreal, 2015). A full English translation of the *Théorie* is included.
- Olivier Darrigol, *Electrodynamics from Ampère to Einstein* (Oxford 2000, paperback 2003). Note that this does *not* mention the Einstein-de Haas experiment.
- James Clerk Maxwell, *A treatise on electricity and magnetism*, volume 2 (Clarendon Press, Oxford, 1873).
- E Atkinson (translator), *Elementary treatise on physics experimental and applied* (Longmans, Green, and Co, 11th edition, London 1883), translated and edited from Ganot's *Éléments de physique*.
- P Curie, *Annales de chimie et de physique*, **V**, 289-405 [sic] (1895) at page 289.
- P Langevin, *Comptes rendus de l'Académie des Sciences de Paris*, **139**, 1204-1207 (1905) and later papers.
- Pierre Weiss, *Journal de physique*, **6**, 667-690 (1907).
- N Bohr, *Philosophical Magazine*, **26**, 1-25, 476-502, and 857-875 (1913); **30**, 394-415 (1915).
- Abraham Pais, *Subtle is the Lord – the life and science of Albert Einstein* (Oxford, 1982). Pages 245-249 discuss the work of Einstein and de Haas critically and as an “interlude” in work on the gravitational field equations. *The collected papers of Albert Einstein*, <https://einsteinpapers.press.princeton.edu/>, volume 6, pages 145-196.
NB The papers by Einstein and de Haas contain material errors and mutual inconsistencies.
- Peter Galison, *How experiments end* (University of Chicago, 1987), Chapter 2. At page 40, he (without comment) corrects Einstein and de Haas's drawing of their apparatus by changing “S” to “H” and inserts “M”.
- Nature*, **602** (3 February 2022): Georg Woltersdorf, 36-38; S. R. Tauchert *et al*, 73-77.
